EC 001				Ge	Coffee humidity is critical which is why might be convenient to include alternatives to maintain the humidity during transport and storage as the use of humidity absorbents, which do not alter the coffee, beans characteristics.		
EC 002		06.01.2		Ge	Usually containers can also have filth (fragments of insects, hair of rodents, etc)	It should be specified that containers must be absent of filth as specified in 4.2.2 for inland transportation.
